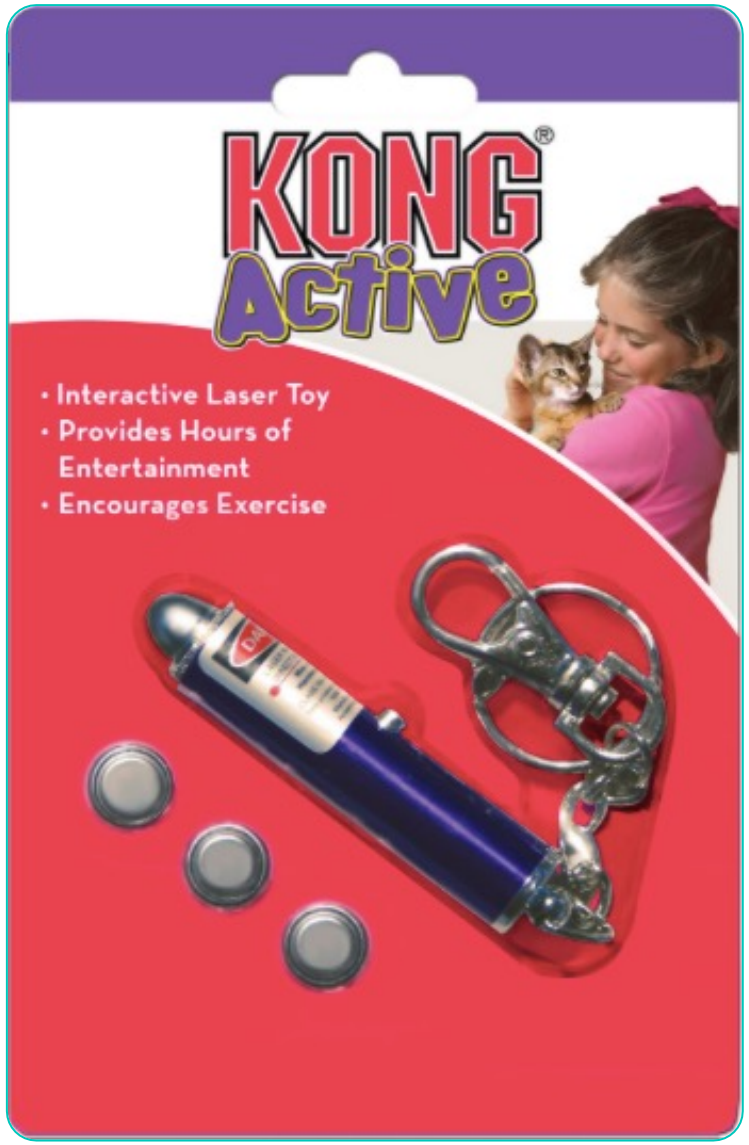
Conceptualization: adding a feature to one of my favorite games.

Game:

Laser Pointer *With* Kitty



What Happens

HOLD DOWN LASER BUTTON

WAVE POINTER AROUND AT RANDOM

CAT LOSES INTEREST BECAUSE IT REALIZES IT IS LIGHT

What Would Happen Ideally

A MACHINE MOUNTED ON THE CEILING MAPS OUT THE ROOM

TURNS OFF THE LASER AT LOCATIONS A SMALL ANIMAL COULD CRAWL UNDER

TURNS THE LASER BACK ON AT PLACES A SMALL ANIMAL COULD EMERGE FROM

Laser would turn off instantly after touching a living being.

This would prevent lasers from getting in eyes, and would also prevent the cat from ever feeling as though it has caught the laser and that the laser is uncatchable, inedible light and air.
